Customer Reviews

This book should be in the office of any doctor treating patients with Hepatitis C. Further, it should be read by anyone who is about to undertake the role of caregiving for someone undergoing long-term treatment for a life threatening illness. The insights and suggestions are practical and, just as importantly, they are made with love. It includes 'how-to' suggestions for talking to family and friends about an illness, any illness; 'how-to' suggestions for taking care of yourself, careful considerations for including children in the caregiving, frank discussions about the impact of treatment on a marriage and on relationships, imaginative and practical ways to feed a sick person, and many other topics rarely presented with such honesty, emotion and helpful research. While

specifically directed at those who are coping with 'Triple Therapy,' a new treatment for Hepatitis C, again, this book could and should be used by anyone coping with the many debilitating treatments for any number of diseases. Ann Mills's story is an example of how a true caregiver can help in every aspect of a patient's life. Her experience inspires us to be the best we can be and to love with the strength of a lioness.

Triple Therapy for Hepatitis C is a sensitive but thorough roadmap that is essential for anyone trying to make sure his or her loved one can make it through the grueling therapy needed for the new miracle Hep C drugs. It uncovers the land mines in dealing with children, employers, a fat-filled diet, and side effects like riba rage and depression. On the 6 month or 12 month marathon to a cure, this caregiver's guide - based on real life experience -- can be almost as important as the miracle drugs.

Interesting story line - mine is OH so similar, 91A10 in RVN - 40 years after diagnosed - Fully convinced the air gun inoculations are to blame. What ever the story, this one rings true to the core.

I absolutely agree with the other reviewer who said this book should be in doctor offices. But not just for doctors treating patients with Hepatitis C. This is a valuable, insightful book for caregivers period. Written from first-hand experience, the book offers a wealth of practical information including how to take care of yourself at the same time! Not only has Ms. Mills done her homework, she also took the time to write it all down for other people. That level of compassion in the midst of caring for her husband is deeply moving and even inspiring.
