People Of The Lie: The Hope For Healing Human Evil

Synopsis

So compelling in its exploration of the human psyche, it's as hard to put down as a thriller...such a force of energy, intensity, and straightforwarness. --This text refers to an out of print or unavailable edition of this title.

Don't even consider buying this book if you haven't read the author's first book "The road less traveled." This is a sequel to that book and a lot of the notions and concepts discussed here were established in the first book. Besides, the author, M. Scott Peck, introduces many controversial suggestions in this book, and most of his findings are either shocking or, at least, unusual. Only by reading the first book you will establish the respect and admiration of the author's wisdom and intellect necessary to hear out his out of the ordinary ideas."The road less traveled" is a psychological study of love and of human spiritual growth, or in other words, the good side of humanity. This book is a follow up to that study. It is only logical that when you study the light that you wonder about the darkness. However, human evil is a concept totally alien to the science of psychiatry. Besides, as the author himself admits, using the term "Evil" can be an act of evilness itself! It is also highly risky to approach the flames of evilness without catching up on its fires yourself! With these precautions Dr. Peck begins a fantastic book in the study of human evil through the eyes of psychiatry. The book begins by telling in detail the story of one of his patients who seemed to be a happy man leading a very normal and healthy life. However, as he carries on, we start realizing along with Dr. Peck that evil was staring the man in every corner of his life, hiding in his problems and even among his family members! It is by the end of the story we realize that this

normal person literally did sell his soul to the devil! How did this happen? How can one sell his soul to the devil? Does the devil even exist? With these questions Dr. Peck dives into the study of evil in human beings. Dr.
