Spinal Cord Injury Short Cut Instruction

Synopsis

Spinal Cord Injury-Short Cut Instruction is a www.civilartsofca.com project. This book is for all wheelchair users, with an emphasis on T-6 to C-5 +/- Spinal Cord Injury level issues. I strongly recommend a copy for those interested in Spinal Cord Injury (SCI) issues and those in the health care profession. Not because it has vast amounts of medical terminology or a sappy memoir, because it doesn't have any of that. I tried to give relative information, with limited filler. It is a collection of to the point solutions and options to problems like simple to complex housing modifications, cheap solutions to tedious and occurring annoyances, DIY accessible furniture ideas, Products found to be useful and worth it, recommendations for personal travel and emergency preparedness, personal safety and awareness tips. It's a short read, written by someone that's not an author but would like to get the tips, tricks and discoveries learned over a decade of paralysis into the public forum.
