Small Cell Lung Cancer - Treatment Options And Alternative Medicine

Synopsis

Small Cell Lung Cancer is a full crash course on the topic. We reviewed over 300 of the strongest natural agents that exist for cancer and found only 6 that have conclusive evidence for small cell lung cancer. The biggest problem is not lack of information in the world, it is the lack of time, understanding of the medical data associated with scientific research and to top it off there is so much data in so many directions between the pharmaceutical, people trying to steer you in the wrong way to make a quick dollar, the quacks of the industry and everything else imaginable where at the end of the day the majority of information learned is wrong. Small cell lung cancer is the fastest growing cancer that exist, there is no time to research or postpone making a decision in treatment. It is our focus to make the unclear, fast and easy to understand. Our aim is to give people the best information possible so that they can take control over their own life, treatments and overall to increase the odds of success in whatever options that may choose after having all the information available and not to waste time. The information presented in this book gives you a clear understanding of what your doctor will not explain and all the contradictions online. It is an easy read that will take you a couple hours at most and give you information to start your treatment at home the same day and even choices if your planning on chemotherapy.
