Customer Reviews

This book is woefully inadequate for children in the intended age bracket. A thirteen year old student should be reading more substantive material in preparation for high school. The offerings for each subject matter reads like a summary with very little fact. Even more troubling, the book is intellectually dishonest. The history of the United States is grand, adventurous, heart-breaking, courageous and violent. There is nothing wrong with the truth, or our nation's journey but unfortunately we are unwilling to teach or hear it. How can our children become the adults defending the ideals and hopes of this nation without understanding the price that has been paid? Homeschool families should use narratives and biographies instead of this empty work.

Excellent book for homeschooling!
