Language: English

ISBN-10: 1591413249

ISBN-13: 978-1591413240

Product Dimensions: 8.5 x 0.4 x 10.7 inches

Shipping Weight: 1 pounds (View shipping rates and policies)

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (26 customer reviews)

Best Sellers Rank: #22,522 in Books (See Top 100 in Books) #27 in [Books > Teens > Education & Reference > Mathematics](#) #53 in [Books > Education & Teaching > Schools & Teaching > Homeschooling](#) #180 in [Books > Textbooks > Science & Mathematics > Mathematics](#)

Customer Reviews

You should purchase this ONLY if you could not find one complete kit and you already have or can obtain the Student/Teacher book and the Answers manual. If this is the case, then you will be spending A LOT more money than you would if you purchased the complete kit. You will NOT be able to teach your child math if all you buy is this book. There should be THREE items in a complete package: a Student/Teacher manual, the Solutions manual (this one) and the (reproducible) Tests and Worksheets. If you have one kid, buy the COMPLETE kit. If you have 2 or more kids, you should buy one complete kit and as many extra student/teacher books, as you may need. If you do not have the ability to copy the worksheets, which is LEGAL, then you should also order additional Tests and Worksheets books. However, for one child, you will end up paying A LOT more if you bought these items individually. Having 2 kids, and this is my experience for the past 5 years, from 3d to 7th grade, I order the complete kit from an education bookseller or from [Amazon](#) if it is available here and an extra textbook from [Saxon Publishers](#) or one of the alternative sellers supported by [Saxon Publishers](#). By the way, Saxon's Math works. I am not a home schooler because I have a full-time job but I've been using it with my kids since 3d grade as a Math booster and I am happy with their A's. Besides math, children acquire

some discipline, study skills, test-taking skills and, me having 2 'students', they learn to compete as well. _____ On the Saxon method: A one-year Math cycle is comprised of 120 lessons, 12 investigations and 23 review tests. Each lesson begins with a quick daily test where certain skills such as addition or multiplication are drilled.
