Customer Reviews

After being shown this book, I ordered two copies; one for my niece and one for my nephew, both of whom will be graduating from eighth grade next spring. Having gone through the experience of looking at, applying to, and choosing colleges with two sons, I can say that the information this book contains is right on the mark. It is thorough, succinctly presented, and easily understood. The list format and quotes from students present the information in a logical way that is fun to read.

Organizing the lists as tasks to be considered during each year of high school makes the college search process much less overwhelming. I wish that "Countdown to College" had been available as my family felt its way through the process for the first time seven years ago.

As the president of College Parents of America, the only nationwide member association dedicated to serving and advocating on behalf of current and future college parents, I consider Valerie Pierce's "Countdown to College" to be one of the most valuable and user-friendly college planning guides in print. When I first began compiling and culling information for parents to access on our Web site ([...] I consulted "Countdown" frequently for resources and easy-to-understand explanations of complex preparation and application processes. I found the book to be concise, well-organized and comprehensive in its "To Do" lists for high school students. Today, my staff and I still keep several dog-eared copies around for quick and easy reference. And, we have enlisted Ms. Pierce as one of our "Ask the Experts" panelists for our members to consult. I highly recommend this book for all

parents of high school students -- and I guarantee that their copies will become dog-eared as well!

I am in eighth grade and am already looking into what to do to get into top colleges. Through all of my research, I have to admit, I got very confused. This book helped me see when to get things done, how to get them done, and also gave some extra sites to help you on your journey through high school and on to college. This book is chocked full of financial aid and scholarship tips, volunteer information, the "ABCs of SATs and ACTs", many checklists of what to do in each grade and in the summers, how to lay out a four year plan, and tons of advice from students who have already taken the journey into college. I would recommend this book to anybody!! And it was easy to read for an eighth grader!! 21 'To Do' Lists for High School is a great investment!!

This book was recommended by our high school's college counselor when our son was a freshman. He is now entering his senior year and it has been has and our "go to" whenever we've needed information, explanations or suggestions for navigating high school. I just purchased the new edition for my niece who's starting high school. The book is comprehensive, yet concise, and I particularly like the fact that the timeline format has allowed us as parents to know "what's up" and when and how we can be supportive. I would also say that the countless resources and opportunities suggested throughout the book have definitely broadened our son's horizons, especially the section on "making summers count". The financial aid section has been of particular benefit to us--we would have clearly headed in the wrong direction had we not read this! All in all, this is a wonderful reference tool for any household with a son or daughter in high school.

This book is a "must have" for any college-bound student. As a certified trainer for the College for Texans program, I know how important it is to start the process early. This book is a comprehensive guide to the entire college preparation, admission and financial aid process. I've seen many, many guides to college and this is very best!

This superb book is best given to a student in 9th grade or soon to be in 9th grade to get the full value of the information. I curiously checked it out from my local library hoping it might contain information about applying to graduate school (it doesn't). I read it anyway and seriously wished it was around when I was applying for college because it would have made life a WHOLE LOT EASIER. And seriously, what poor high school kid couldn't benefit from a little bit of assistance on one topic - college - that's going to haunt them for four years and cause unparalleled stress. Not only

does it contain basic to-do lists for each academic year, but it provides a wealth of information on volunteering, scholarships, summer jobs, extracurricular activities, travel opportunities etc etc. It has advice on making the most out of your high school education and keeping things organized so that when it does come time to apply for college it doesn't take 4 months to track down every last scrap of information you need. Prevent ulcers, migraines and stress-zits in you favorite 14-year-old and give them this book!

I have loaned out my second copy and will probably buy 2-3 more because we have lots of friends with kids in high school. Everyone LOVES this. This is another awesome book I stumbled upon on that we've been referring to a lot for the past two years. Nice affordable gift for a family or a teenager. Great resource to help you keep up with the tests, college applications, finances, scholarships, jobs, visiting schools, and almost every imaginable part of college preparation. No matter what grade your student is in, it is not too late. You will find lots of helpful information to help you get on track and ready for college. Highly recommend this!
