

Synopsis

Painstakingly edited for an optimized eBook reading experience, this manual provides guidance for planning and executing training on the 5.56-millimeter M16-series rifle (M16A1/A2/A3/A4) and M4 carbine. It is a guide for commanders, leaders, and instructors to develop training programs, plans, and lessons that meet the objectives or intent of the United States Army rifle marksmanship program and FM 7-0. This manual is organized to lead the trainer through the material needed to conduct training during initial entry training (IET) and unit sustainment training. Preliminary subjects include discussion on the weapon's capabilities, mechanical training, and the fundamentals and principles of rifle marksmanship. Live-fire applications are scheduled after the Soldier has demonstrated preliminary skills.

Ch1 â€œ Marksmanship Training
Ch2 â€œ Weapon Characteristics, Accessories, and Ammunition
Ch3 â€œ Troubleshooting and Destruction
Ch4 â€œ Preliminary Marksmanship and Mechanical Training
Ch5 â€œ Downrange Feedback
Ch6 â€œ Field Fire
Ch7 â€œ Advanced Rifle Marksmanship
Ch8 â€œ Advanced Optics, Lasers, and Iron Sights

A â€œ Training Aids, Devices, and Exercises
B â€œ Scorecards
C â€œ Night Firing
D â€œ Range Safety and Risk Management
E â€œ Range Procedures and Range Operations Checklist
F â€œ 10-Meter Target Offsets and 25-Meter Zero Offsets

This manual was revised to include references to new materiel and systems. This revision includes:

- The new Army total marksmanship training strategy, to include specific strategies for the United States Army Reserve (USAR) and the Army National Guard (ARNG).
- Information about the advanced combat optical gunsight (ACOG), the AN/PEQ-15 advanced target pointer/illuminator aiming light (ATPIAL), various thermal sights, and the MK 262 round.
- Information about the alternate qualification record fire courses (known distance [KD] record fire, 25-meter scaled target alternate course, 15-meter scaled target alternate course).
- Information about the rapid magazine change and barricade transition fire for short-range marksmanship (SRM).
- Changes to all of the scorecards.
- Updated terminology.

Customer Reviews

This book is a great book of instruction whether novice or experienced. Lots of information and descriptions. Very thorough and enjoyable to read and easy to understand. This book is well worth the money from my perspective.

This is the full text of FM 3-22.9. If you flew the instructions, not only will you be able to qualify on the M-4 and M-16 platforms, you'll be able to teach your skills to others. Sure, it's a dry read, but marksmanship is a great skill to cultivate, and I really enjoy working with others to increase their skills. This is the manual I use, at work and at play.

This is a good way to review the fundamentals at a good price. You may not understand as much if you don't have any military background, but over-all a good reference. Be advised: no fancy moves or secret ninja techniques, just the basics.

I downloaded this fm and found it informatitive but if your gonna spend your money on a book then buy "Green Eyes and Black Rifles" by Kyle Lamb and "Defensive Rifle Training Program" by Michael Seeklander both these guys have dvds that go with the books and they both also have handgun versions of thier books and dvds. Kyle Lambs books breakdown technique and basic skills while Michael Seeklanders book breakdown drills and routine set up.

I prefer to have a text on hand instead of trying to read a book off my iPhone. Great for beginning rifleman or a veteran. I've read parts that we never covered in basic.

Awesome for Sergeant's time training. Plenty of insight on how to fire your rifle. Covers everything from basic rifle marksmanship to advanced marksmanship.

Good platform for down time info. Kind of redundant. Could have been just as effective with fewer repeats.

Very happy with the product & cost, deliver was very fast, and ended up buying another one for a friend.
