Customer Reviews

The review by "Shopping Star" from 2013 gives a skewed perspective concerning the utility of Balla's Financial Accounting CLEP review. Balla's book presents a solid, well-organized, and reader-friendly introduction to the essentials of financial accounting. It provides the knowledge and skills necessary to pass the CLEP examination without the need for any additional text material. Since "Shopping Star's" negative review was his/her sole contribution to --no other reviews have been submitted--this may well be the product of one of Balla's competitors in the academic marketplace. I have no connection with Balla or his publisher--I do appreciate that he produced a review that enabled me to pass the CLEP examination without any prior knowledge of financial accounting.

Gave this one star for the book and an added one star for the practice test. On one hand this book is lacking information needed for the CLEP test. On the other hand the book gives too much information that is not a test requirement to know. Other sources of material has to be used to make up for the missing information. Luckily the missing information can be found on the internet for free. Accountingcoach / investopedia are two great sites that fill in some but not all information needed. There is some odd ball requirements for the CLEP that must be searched for. Activity analysis is one of the odd ball terms that has to be searched for on the net that I can recall.

I found this CLEP book to be ok. It is not an easy reader unless you already have some background in the subject. I have found that studying for the CLEP can be done pretty much free. The online exams are nice and do provide you with somewhat of a starting point and individual feedback based on your answer selections and overall performance.
