# A Cure For Asthma?: What Your Doctor Isn't Telling You--and Why

## Synopsis

This book challenges conventional wisdom about the causes and treatments of asthma. Could hard-to-treat asthma be triggered by a persistent infection? Dr. David Hahn presents the scientific evidence and compelling case histories that led him to his surprising conclusion. He describes the treatment protocol he has used successfully. Find out if your asthma might be cured instead of managed. If you suffer from adult-onset or steroid-resistant asthma, you will find stories from patients like you who overcame their breathing difficulties using Dr. Hahn's treatment protocol. If you are a health care provider, you will find medical references explaining the biological underpinnings of *C. pneumoniae* and *M. pneumoniae* as sources of respiratory inflammation. You will also find Dr. Hahn's specific recommendations on the protocol for treating these smoldering infections.

## Customer Reviews

Hello my name is David! Four years ago I had a bout with bronchitis for a year. The medical group that I belonged to gave me azithromycin for the condition. The azithromycin helped for about two months and then I came down with bronchitis again. Finally, the last dose of azithromycin got rid of

the bronchitis but left me with asthma. I am retired federal so I can have any insurance plan there is during our open season in November. Sadly, at the time, I had Kaiser Health Insurance. My doctor would not listen to me about a treatment for asthma using azithromycin that I had heard of being used by Dr. Hahn and another physician in Ohio who claimed to have a 90% cure rate. I had to go outside of Kaiser to a private physician with money out of my own pocket. He had heard of this cure for asthma and gave me the prescription for azithromycin. Some background information on the asthma that I had for your information! I could not sleep at night mostly due to coughing my head off all night long. Once in a great while you could get up what I called superglue and you would feel much better. I battled this condition for a year and it was miserable. I believe it is the worst condition when you cannot breathe like normal people. I was put on Spiriva and two inhalers that are steroids and certainly not good for people to be on and they did not help that much anyway! Now I use nothing and am asthma free with more money in my pocket without paying for all the medications! Needless to say, after the treatments with azithromycin the asthma went away. I could breathe at night once more and slept like a baby. Now, this is not the end of it because like a lot of people using this treatment it did come back again.
