35 Reading Passages For Comprehension: Inferences & Drawing Conclusions

Synopsis

Repeated practice builds mastery, and this book provides exactly the practice students need to master the reading skills of making inferences and drawing conclusions. The 35 reproducible pages in this book feature high-interest nonfiction reading passage with short-answer practice questions that target one of these essential reading comprehension skills. Flexible and easy to use—in school or at home—the book also includes model lessons, assessments, and an answer key. For use with Grades 4-8.

Age Range: 9 - 13 years

Grade Level: 4 - 8

Customer Reviews

Written for the average 4th to 8th grader, this book offers 35 worksheets for students to learn test practice and quickly draw conclusions and inferences. Page illustrations are minimal, appropriate for students up through high school. The last few worksheets are for testing a student's written skills of mastery of the topic at hand. I would have liked to see a broader spectrum of reading levels addressed in the reading samples. Still worth the purchase.

Good book with a good introduction to inferences and drawing conclusions. However, I wish there were longer passages and more questions that were thought provoking.

This book is very basic. The paragraphs are very short and only have 2 questions per story. This book could have been so much better. At first I thought it was a waste but then decided to incorporate a grammar lesson using the paragraphs, ex. Picking out verbs, nouns, etc. The reading level is geared more towards grades 4 & 5. They are too easy for any grades above that.

I really like this for my daughter who is in the 5th grade. it actually helped to improve her grade and she really understands inferences better. I wish the stories were a little longer but I guess it's best to keep it short to facilitate a better understanding. I would recommend this to anybody looking to improve their child's learning.

Great way to work with improving reading comprehension using inferences & drawing conclusions. These reading passages enable someone to learn how to use a very difficult skill like inferring to improve their reading comprehension.

I teach 6th grade and bought this book to use as a quick daily skill builder at the beginning of reading class. I also have other books in the series. Each week, we focus on one of the concepts (there are two concepts per book) and I give my class an exercise from that concept each day. They are quick and easy, but effective in developing important reading skills for non-fiction passages. The passages are well written and interesting. My students enjoy reading them and we are all learning new information, vocabulary, and facts about a variety of topics. The only thing, I would like to change is the answer key. There are only answers for the multiple choice questions. It would be nice to have sample answers for the fill in questions. You can figure them out, but sample answers save time. I would recommend these to any busy teacher (or homeschooling parent) looking to practice important reading skills in a fun, easy, and effective way.

I got this for my son entering 3rd grade because his teacher told us that it will be the focus on the 3rd grade curriculum. So we got this to practice for the summer so get him familiar with the concept. I like it and it's affordable. I rate it 5 out of 5 STars.

This resource was used for a group that was a little older but hadn't learned these principles prior. It was very clear cut and the practice exercises put everything into the right perspective. Now just need to find a resource for high school or business world use.
