"This book would be very useful for both university reading courses and classroom teachers. I use Words Their Way both in my first grade classroom and with college students as a way to implement word study".--Kristi McNeal, CSU Fresno "The theory behind and practice for word sorts allows even the novice teacher to understand how to use the assessments to organize instruction. The organization of the last five chapters creates a useful resource for teachers. Each begins with a research-based description and moves into sound instructional practices, giving the teacher a complete understanding of how to meet the needs of students."--Cathy Blanchfield, CSU Fresno

My children attended a public school where this program was used. When I brought them home due to their various LDs/allergies, I balked at the \$40 price tag of this book and opted for the less expensive Spectrum Spelling books for their grade level. I found those to be rather annoying because often my children already knew the words. And the ones they didn't know, they would spell correctly on the tests, but they didn't necessarily continue to spell the words correctly in their writing. Mid-way through the year I abandoned the Spectrum books and purchased this one. My favorite thing about this approach is how the kids really think about and interact with the words. It is a disciplined program, I require my kids to do a word sort and an activity in their spelling journals every day -- their choice. However, this typically takes less than 10 minutes a day. The other thing I do is pretest the kids every week to find out which words they need to study. If they already know a spelling pattern, then I don't give it to them and move on to the next one. Sometimes I pull misspelled words out of their writing, and then find the pattern that applies and give them those words for the week. I will say, that for most homeschoolers, this book is pretty heavy on the theory, and the "how-to" is mixed up with the theory so it may take more work up front to start the program if you are unfamiliar with the idea of spelling notebooks and word activities. But it is quite fascinating, and will give you a new appreciation for a young child's emerging spelling skills, as well as concrete strategies for helping older students with more complex words. As for content, the book covers spelling from pre-K through at least middle school, perhaps early high school.
