Satellite TV Distribution (Home Digital Systems Book 9)

Synopsis

This series of publications introduces the reader to the application of digital systems in the home. It is suitable for those with no prior knowledge of the subject, whilst at the same time providing a source of reference for experienced installers who wish to know more about the subject. This part (part 9) covers multiple Sky installations in a domestic environment. It starts with a single output LNB and develops to an Octo LNB thereafter moving to the concept of an integrated reception system, with various layouts. Multi-satellite systems are then described by introducing system concepts and installation methods. The final section outlines the principles of earthing and lightning protection. Parts one to twelve cover radio, TV and satellite reception and distribution; parts thirteen to sixteen cover data systems and part seventeen is a reference of abbreviations and a glossary of terms.
