## Customer Reviews

I wouldn't say that this text is geared to 'just non-trads', but to everyone. Pros: This author encourages you to contact him... impressive for any author, let alone an M.D. He gives a 'real-world' view of medicine, and this being his 9th edition, has a fair amount of experience in the 'pre-med' arena. One thing I really like about this book is the reality check it gives. Facts like M.D.s have about 10 years of post-graduate education, yet are told what to do by people who went to school for only 2 years post graduate to get their M.B.A.'s (Since medicine is becoming cooperatized by HMO's, and new physicians are finding themselves joining managed groups or hospital positions, ran by 'management' MBAs). The fact that HMO's are taking over and autonomy is no longer available for

the physician. The fact that it is no longer a 'stable' career as U.S. and foreign medical schools are cranking out more physicians than the demand, and that salaries fell for the first time ever recently... and that it will ultimately be the willingness to be of service and to help that will continue to spur students into medicine, as salaries continue to fall and current M.D. positions are replaced by PAs FNP's and other specialists. He, and many physicians I've talked to, have supported his idea that M.D.'s are losing their security by the excess supply, and replacement by PAs, FNP's etc. These are the things that few 'Get In' texts fail to mention, yet many physicians attest to. Cons: You only get 'half' a book. The first half is the book, the second half is a dummed down version of the Medical School Admission Requirements (which you should get if you are seriously considering medical school).
