IP6: Nature's Revolutionary Cancer Fighter: Nature's Revolutionary Cancer-Fighter

Synopsis

The author uses clear, easy-to-understand language to explain how this all-natural cancer fighter works to kill cancer cells, shrink tumors, and boost immune system's defenses. Plus, Dr. Shamsuddin explains how IP6 alone, or combined with inositol, has dramatic health benefits for diabetics and sufferers of sickle cell anemia. He also produces test results for its ability to prevent kidney stones, lower cholesterol and triglyceride levels, fight infection, and reduce risks of heart disease.

Book Information

Mass Market Paperback: 192 pages

Publisher: Kensington (September 1, 1998)

Language: English

ISBN-10: 1575663570

Customer Reviews

this brilliant researcher that dedicated his life to the research of the ip6 , is now getting a full acceptance to his natural anti cancer substance:the ip6.it was proved to be a anti-cancer substance against almost any kind of cancer, and it is in my opinion marching behind (but not far behind) the antioxidants vitamins:c\beta caroten\selenium\coq10\dr shamsudin explain and explored in detail the ip6 better than anybody, and also reveal the mechanisms of it and also in what kinds of foods you can find it,eventhough you will have to take an extra supplements.he shows scientific proves and graphs that showing beyond any reasonable doubt that this remarcable ip6 is a potent anti cancer agent. the book is very easy to understand, buy this book today.

This book gives hope to a society plagued by cancer. Dr. Shamsuddin has summarized nearly a decade and a half of research into one book, accompanied by one product. He confirms that nature has always had an anti-cancer agent and that agent has no side effects. He supplies the reader with

studies and information that confirm his findings, and even mentions a product that has this wonder nutrient in it. I highly recommend this to those battling cancer and those wishing to protect themselves from it.

I'm amazed to see that the last review of this book was in 2000 - nearly five years ago! Yet the information in this booklet is mandatory for everyone - especially in this age of cancer run rampant. The author of this book is a pathologist who has spent years studying the causes and possible inhibitors of cancer, and his research is meticulous and very, very interesting. He has also managed to develop a test for colon cancer which I would imagine would alleviate the necessity for invasive diagnostic procedures such as colonoscopies - and apparently it will pick up the propensity for colo/rectal cancer long before a cancer actually develops. Ip6 is a derivative of inositol which is part of the B complex of vitamins, and is found in a variety of foods. Dr Shamsuddin has performed many experiments using Ip6 supplementation with rats who have been injected with carcinogens. Though I don't agree with animal experimentation (even with rats), the evidence is indisputable that Ip6 is preventative and has a definite inhibitory effect even on advanced tumours. Ip6 is also an effective chelator of minerals, and manages to bind to free floating iron - which is wonderful news for people with a high iron load - now recognised to be an important factor in the development of heart disease and cancer. Read this book - if you are healthy, it may assist in keeping you that way. If not, it may help to turn things around for you.

In IP6, NATURE'S REVOLUTIONARY CANCER-FIGHTER, Dr. Shamsuddin presents the results of his years of research into what he terms as a potent anti-cancer supplement. Dr. Shamsuddin is more suited as a researcher than a writer as he uses a prose style that suggests his target audience is for readers much like himself. Still, for those laymen with the patience to plow through his fondness for a density of arcane prose, the results are well worth it. His research shows that a little-known component of plants called IP6 has a staggering impact on the reduction of a variety of cancers that currently plague human beings. When IP6 is combined with another common substance called inositol, the combined impact is collectively greater than either alone. This news has profound implications for those who currently have cancer and for those who do not but wish to avoid it. He adds that the potential downside is virtually nil. Therefore, IP6 ought to occupy a prominent place on any anti-cancer regimen. One ought not to assume, however, that regardless of the promise of this newest wonder drug, that other and equally potent approaches can be discarded. If one combines IP6 with, say AHCC, in conjunction with a generally organic and

toxic-free diet, then the scourge that we call cancer might become a thing of the past.

Dr. Shamsuddin offers a very appropriate and understandable treatise of his many years of investigating the properties and effects of a simple yet important nutritional substance. Using well designed experiments he presents the significant effects of IP6 on cancer and other diseases. As a researcher and physician myself, I find his work and its presentation praiseworthy. I use IP6 in treating patients confidently due to the evidence he provides. Importantly his work is educational and lacking of any huckstering of "supplements" so prevalent in the media. Richard R. Mason MS, DO, NMD

Ours is more than a polite-reaction-of-appreciation-"review" of Dr. Shamsuddin's book and work...It is a personal anthem of praise and thanks to one the greatest and magnanimous men and his accomplishments in cancer research to date. Dr. Shamsuddin and his associates have proven without a doubt that IP6 works and it is one of the best supplements one can take without fear or anxiety at a very inexpensive price. He and his staff have, with unbridled enthusiasm, passion, integrity and just plain persistence and perseverance, dedicated over 20 years of their lives in diligent research with miraculous and remarkable results and health benefits in the cure and prevention of cancer and other maladies afflicting millions. One would think that their accomplishments and findings would be front-page news and heralded world-wide in the Media. Well, we all can imagine as to the reasons why...Nonetheless, their work and its benefits continue to bless many daily. This ubiquitous, potent, yet humble miracle-worker-substance, simply named IP6, is a blessing. I know. I have been taking IP6 since 1998. My wife, Kathy, is taking it as well. She takes 4 capsules per day. I actually take 16! Bottom line: Dr. Shamsuddin's book is a blessing. It is easy to read; there is no arrogance, nor personal hidden agenda. His work is presented on a pop-level for all to understand and appreciate. His objective is to explain what he and his associates have been (and still are) doing and pass it on to the general public for the benefit of all. Hard work, brilliance and humility are the virtuous ingredients of this remarkable team. It is a must read for the everyman and health professionals alike. Bravo! Dr. Shamsuddin. Vince and Kathy Di Paolo
