Customer Reviews

My cat Herb developed cancer at the site of a rabies shot given to him by a previous owner [I don't vaccinate my animals.]The rabies shot is supposed to be given in the leg so when cancer develops the leg can be amputated .The rabies shot given to Herb was below the back of his neck. Typically cats with cancer from a rabies injection die in a matter of months.POLY-MVA kept Herb alive - and strong - FOR OVER 6 YEARS!! presently have a small rescue dog 16+ years old. I started giving her POLY-MVA two months ago.Her energy level has soared and now she can run for blocks!

This book was very informative and gave examples of people who have used Poly MVA successfully and how to take it. If you are a cancer patient or caregiver I would encourage you to read this book.

Would recommend this product to anyone looking for alternative medications. It is very useful in

your search for an excellent answer.

most interesting information---my friend lived 34 months of quality life longer with stage 4 lung cancer---once she stopped---died in three months.

Fantastic... a life savor. G-d Bless.
