Customer Reviews

Before I begin, let me state the reason for this review. I could not care less about the book or it's author, I don't write competitive books or just go around banging on people for no reason. You can take a look at what I review and it's all over the board from 1-5 stars, I get a lot of helpful votes, and most of it is about products, not self-help books. I came here looking for an honest book and as always, I look at the reviews. I also read the free parts given by the author in the Kindle preview. It is after doing so that what I see here simply makes me angry at those who game the system like this author. That is my OPINION, backed up by facts, as to what has happened here and why I bothered with a review on this pamphlet where I wouldn't have otherwise. Read my rationale and if you then decide to give the author your \$3.99, then please do so with my blessings. First, this book claims that coconut oil becomes a substance in your body that kills the AIDS and Herpes virus. No, I didn't buy the book, but it's there for anyone to read. Read it for yourself in the Kindle review. No reputable "Doctor" in the medical field claims any such thing, so I question whether the author really is a Doctor as the author claims. Second, this so-called book contains nothing that isn't found on thousands of free to read websites. There's no documentation, no research studies cited, etc. Just an unverifiable list of supposed uses. This book is a 5- minute read at best, IF you are a slow reader

and IF you read all the other garbage like "How to use this book". Really? Do people actually need instructions on how to use a book now? Or is this just filler information to add more material to the book?
